Media and
Communication

Admission Year: 2025

Reason for Choosing Kwangwoon University

The main reasons I chose Kwangwoon University are its excellent location, strong academic reputation, and reasonable academic conditions for international students. Kwangwoon University provides a wide range of scholarship programs, well-structured educational curricula, and diverse extracurricular activities, creating an environment that supports students' holistic development. In addition, the university is home to a faculty distinguished by professionalism and a strong sense of responsibility, who actively support students not only in their academic studies but also in career planning and professional development. At Kwangwoon University, I have found a unique academic atmosphere that values in-depth scholarly inquiry and personal growth beyond merely achieving high grades or accumulating credits.

Reasons for Choosing My Major

I choose the School of Media and Communication because this field aligns most closely with my interests. I have long been interested in advertising,

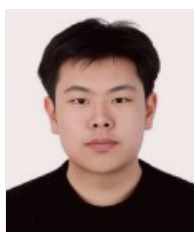

marketing strategies, and video editing, and this department allows me to study these areas in an integrated and comprehensive manner.

The curriculum covers a broad range of topics within the media field, enabling students to acquire diverse knowledge and thoughtfully consider their future career paths. For these reasons, I believe that choosing the Department of Media Communication was a very appropriate decision for my future career planning and professional development.

Message to Incoming Students

Studying abroad is never easy, but through this journey, one gains valuable knowledge and irreplaceable experiences. It goes beyond simply earning a degree; it is an opportunity to gain a deeper understanding of oneself, broaden one's perspective, and grow into a more independent individual.

Despite the challenges that may arise, this experience will surely reward all the effort invested and serve as an important turning point in your personal and professional growth.

Robotics

Admission Year: 2025

Reason for Choosing Kwangwoon University

The primary reason I chose Kwangwoon University lies in its strong academic tradition in science and engineering and its abundant practical resources. Kwangwoon University is recognized as one of Korea's four leading universities in electronics and has played a pioneering role in the history of electronic engineering research in Korea. It is also the first university in the country to establish a Department of Robotics. In particular, the university enjoys a top-tier academic reputation nationwide in the fields of artificial intelligence and robotics. In addition, the university has a well-established scholarship system that is highly supportive of international students. Through its Office of Global Strategy and a dedicated International Students' Association, the university provides comprehensive support ranging from academic counseling and assistance with adapting to life in Korea to psychological and emotional care, enabling international students to pursue their studies and daily lives in a stable and supportive environment.

Reasons for Choosing My Major

I chose this major because it aligns well with

both my personal interests and current trends in industrial development. AI robotics is a cutting-edge field that integrates mechanical engineering, computer engineering, and artificial intelligence, and it perfectly matches my desire to "give technology real agency and action in the real world." Through this program, I can not only develop strong technical expertise in my field but also cultivate creativity through a spirit of inquiry and hands-on practical experience.

Message to Incoming Students

From the moment you pass through immigration, you become an adult fully responsible for yourself. Taking this single step already places you ahead of 99 percent of people. However, do not let your guard down, the real challenge begins from this point forward. Although you may encounter difficulties along the way, you will ultimately be able to overcome them one by one through your own efforts. Before enrollment, I strongly encourage you to familiarize yourself with your major's curriculum and foundational subject knowledge, and to build a solid foundation in both Korean and English. This preparation will be of great help not only in your classes but also in all aspects of daily life in Korea.

International Trade

Admission Year: 2024

Reason for Choosing Kwangwoon University

I am very proud to have the opportunity to study at Kwangwoon University. Kwangwoon University is one of Korea's leading universities, with a long history and an excellent reputation. It is widely recognized for its high-quality education and strong academic standing. In addition, its convenient location, with easy access to central Seoul, provides students with excellent opportunities not only for academic success but also for personal growth and diverse experiences. Moreover, the professors and staff members are always kind, passionate, and dedicated to supporting students' development. One of the aspects that impressed me the most is the university's well-organized scholarship system. These scholarship programs not only motivate students to excel academically but also help international students like me reduce the financial burden of tuition fees. To me, Kwangwoon University is more than just a place to acquire knowledge. It is a place where I can pursue my dreams, continuously improve myself, and grow step by step in an international academic environment.

Reasons for Choosing My Major

I chose to major in International Trade because I aspire to become a professional who possesses both strong theoretical knowledge and practical skills in today's global economy. The curriculum of the Department of International Trade at Kwangwoon University offers a balanced

combination of theory and practice, covering subjects such as international economics, international trade practices, and global business strategies. This comprehensive curriculum enables students to gain a solid understanding of the field and apply their knowledge effectively in real-world situations. Through my studies in International Trade, I hope to broaden my global perspective while strengthening both my language proficiency and professional expertise. My ultimate goal is to become a capable professional who can actively contribute to the field of international business.

Message to Incoming Students

I would like to share a few words with the new students who are about to begin their journey at Kwangwoon University. At first, you may feel unfamiliar or even anxious because of the new environment and language. However, there is no need to worry too much. The university, professors, and staff members are always ready to support and assist students whenever needed. In addition, the Vietnamese Student Association and various student clubs and organizations on campus will be valuable sources of support throughout your university life. Whenever you have questions or face difficulties, do not hesitate to ask for help. I also encourage you to actively participate in campus activities and make the most of every opportunity. Most importantly, believe in yourself and never give up. I sincerely hope that your time at Kwangwoon University will become a meaningful and unforgettable chapter in your life.

Media and
Communication

Admission Year: 2022

Reason for Choosing Kwangwoon University

The primary reason for choosing Kwangwoon University is its high-level scholarship system. The university offers scholarships ranging up to 100%, based on TOPIK scores at admission and individual academic performance thereafter. I chose Kwangwoon University because I believe the advantage of receiving benefits for my own hardworking is a great incentive. As a student with the goal of acquiring scholarships throughout my school life, I consider this scholarship system to be an excellent encouragement for students' academic determination.

Reasons for Choosing My Major

Since my original major was in arts and culture, I thought that the field where I could actively apply related knowledge was media. Therefore, I chose the Department of Media Communication at Kwangwoon University. The department is divided into three majors: Media Entertainment, Interactive Media Communication, and Strategic

Communication. After admission, students can choose one of these three majors to delve deeper into their specific areas of interest. The appeal of learning about media broadly while focusing more deeply on the desired field was an enticing prospect for me to believe in my decision to join Kwangwoon University.

Message to Incoming Students

Before entering university and continuing afterward, I believe it is crucial to maintain a diligent study attitude. Learning a major field in a foreign language is not an easy task, but through consistent effort, I learned that achieving even small results brings great joy and confidence. Kwangwoon University provides substantial scholarships based on good academic performance, which I believe serves as a motivation. Take advantage of the various benefits offered by Kwangwoon University, including the support of friendly professors and the university's proactive assistance. I hope you make the most of these opportunities for a fulfilling university life.
